

Slash My Bill Report

Generated: 2026-03-18 21:52:03 UTC

Invoice: EUINIL26-139120

Account: 845760127781

Period: 2026-02-01 to 2026-02-28

Bill Summary

Total Cost: USD 2343.72

The total cost for the billing period from February 1, 2026, to February 28, 2026, was \$2343.72. The top spenders were Amazon Relational Database Service (RDS) at \$568.38 and Amazon Elastic Compute Cloud (EC2) at \$532.74.

Service	Cost (USD)
AWS Service Charges	781.24
Amazon Relational Database Service	568.38
Amazon Elastic Compute Cloud	532.74
Elastic Load Balancing	129.60
Amazon Virtual Private Cloud	126.96
AWS WAF	52.10
Amazon ElastiCache	48.22
AmazonCloudWatch	34.08
AWS Key Management Service	21.24
Amazon Route 53	17.92
AWS Config	13.08
Amazon EC2 Container Registry (ECR)	6.56
AWS Secrets Manager	5.66
AWS Data Transfer	3.68
Amazon Simple Storage Service	1.82
AWS Cloud Map	0.24
Amazon Elastic Container Service	0.10

Amazon CloudFront	0.10
Total	2343.72

Service Analysis

Amazon Relational Database Service \$568.38	
You ran a database service for a certain number of hours at a specific rate, leading to the total cost. How you are charged: Hours x Rate = \$568.38	How to save: • Right-size your RDS instances Evaluate your database workload and adjust the instance type and size to match your needs, which could reduce costs by 10-30%. Savings: 10-30% • Implement Database Savings Plans Commit to a consistent \$/hr spend on database services for 1 or 3 years to save up to 35%. Savings: up to 35%
Amazon Elastic Compute Cloud \$532.74	
You ran EC2 instances for a certain number of hours at a specific rate, leading to the total cost. How you are charged: Hours x Rate = \$532.74	How to save: • Right-size your EC2 instances Evaluate your EC2 workload and adjust the instance type and size to match your needs, which could reduce costs by 10-30%. Savings: 10-30% • Implement EC2 Instance Savings Plans Commit to a specific EC2 instance family in a chosen region for 1 or 3 years to save up to 72%. Savings: up to 72%
Elastic Load Balancing \$129.60	
You used Elastic Load Balancing for a certain number of hours at a specific rate, leading to the total cost. How you are charged: Hours x Rate = \$129.60	How to save: • Monitor and optimize load balancer usage Regularly review and adjust your load balancer settings to ensure you are not over-provisioning, which could reduce costs by 10-20%. Savings: 10-20%
Amazon Virtual Private Cloud \$126.96	

You used VPC resources for a certain number of hours at a specific rate, leading to the total cost. How you are charged: Hours x Rate = \$126.96	How to save: • Optimize VPC resources Regularly audit and remove unused VPC resources to reduce costs by 10-30%. Savings: 10-30%
AWS WAF \$52.10	
You used AWS WAF for a certain number of requests at a specific rate, leading to the total cost. How you are charged: Requests x Rate = \$52.10	How to save: • Optimize WAF usage Review and adjust your WAF rules to avoid unnecessary requests, which could reduce costs by 10-20%. Savings: 10-20%
Amazon ElastiCache \$48.22	
You used ElastiCache for a certain number of hours at a specific rate, leading to the total cost. How you are charged: Hours x Rate = \$48.22	How to save: • Right-size your ElastiCache instances Evaluate your ElastiCache workload and adjust the instance type and size to match your needs, which could reduce costs by 10-30%. Savings: 10-30%
Amazon CloudWatch \$34.08	
You used CloudWatch for a certain number of metrics, logs, and events at a specific rate, leading to the total cost. How you are charged: Metrics/Logs/Events x Rate = \$34.08	How to save: • Optimize CloudWatch usage Review and adjust your CloudWatch settings to avoid unnecessary metrics, logs, and events, which could reduce costs by 10-20%. Savings: 10-20%
AWS Key Management Service \$21.24	
You used AWS KMS for a certain number of requests at a specific rate, leading to the total cost. How you are charged: Requests x Rate = \$21.24	How to save: • Optimize KMS usage Review and adjust your KMS settings to avoid unnecessary requests, which could reduce costs by 10-20%. Savings: 10-20%
Amazon Route 53 \$17.92	

You used Route 53 for a certain number of queries at a specific rate, leading to the total cost. How you are charged: Queries x Rate = \$17.92	How to save: • Optimize Route 53 usage Review and adjust your Route 53 settings to avoid unnecessary queries, which could reduce costs by 10-20%. Savings: 10-20%
AWS Config \$13.08	
You used AWS Config for a certain number of configuration items at a specific rate, leading to the total cost. How you are charged: Configuration Items x Rate = \$13.08	How to save: • Optimize Config usage Review and adjust your Config settings to avoid unnecessary configuration items, which could reduce costs by 10-20%. Savings: 10-20%
Amazon EC2 Container Registry (ECR) \$6.56	
You used ECR for a certain number of requests at a specific rate, leading to the total cost. How you are charged: Requests x Rate = \$6.56	How to save: • Optimize ECR usage Review and adjust your ECR settings to avoid unnecessary requests, which could reduce costs by 10-20%. Savings: 10-20%
AWS Secrets Manager \$5.66	
You used Secrets Manager for a certain number of requests at a specific rate, leading to the total cost. How you are charged: Requests x Rate = \$5.66	How to save: • Optimize Secrets Manager usage Review and adjust your Secrets Manager settings to avoid unnecessary requests, which could reduce costs by 10-20%. Savings: 10-20%
AWS Data Transfer \$3.68	
You transferred data for a certain amount at a specific rate, leading to the total cost. How you are charged: Data Transfer Amount x Rate = \$3.68	How to save: • Optimize data transfer Review and adjust your data transfer settings to avoid unnecessary data transfer, which could reduce costs by 10-20%. Savings: 10-20%
Amazon Simple Storage Service \$1.82	

You stored data for a certain amount at a specific rate, leading to the total cost. How you are charged: Data Storage Amount x Rate = \$1.82	How to save: • Optimize S3 storage Review and adjust your S3 storage settings to avoid unnecessary data storage, which could reduce costs by 10-20%. Savings: 10-20%
---	---

AWS Cloud Map \$0.24	
You used Cloud Map for a certain number of requests at a specific rate, leading to the total cost. How you are charged: Requests x Rate = \$0.24	How to save: • Optimize Cloud Map usage Review and adjust your Cloud Map settings to avoid unnecessary requests, which could reduce costs by 10-20%. Savings: 10-20%

Amazon Elastic Container Service \$0.10	
You used ECS for a certain number of tasks at a specific rate, leading to the total cost. How you are charged: Tasks x Rate = \$0.10	How to save: • Optimize ECS usage Review and adjust your ECS settings to avoid unnecessary tasks, which could reduce costs by 10-20%. Savings: 10-20%

Amazon CloudFront \$0.10	
You used CloudFront for a certain number of requests at a specific rate, leading to the total cost. How you are charged: Requests x Rate = \$0.10	How to save: • Optimize CloudFront usage Review and adjust your CloudFront settings to avoid unnecessary requests, which could reduce costs by 10-20%. Savings: 10-20%

Savings Plans & Reserved Instances

Savings Plans: Active	Reserved Instances: Active	Potential Savings: up to 72%
------------------------------	-----------------------------------	-------------------------------------

Given the active Savings Plans and Reserved Instances, consider further optimizing by implementing additional Savings Plans for EC2, RDS, and other services to maximize savings.

How to get started:

Purchase Savings Plans and Reserved Instances via the AWS Management Console under the Cost Explorer > Savings Plans section.

Report generated at 2026-03-18 21:52:03 UTC

Disclaimer: This analysis is provided for informational purposes only. Actual savings may vary. Please verify recommendations with your AWS account team.

Invoice: EUINIL26-139120

Account: 845760127781

Period: 2026-02-01 to 2026-02-28

Bill Summary

Total Cost: USD 2343.72

The total cost for the billing period from 2026-02-01 to 2026-02-28 is \$2343.72. The top spending services are Amazon Elastic Compute Cloud (EC2) at \$532.74 and Amazon Relational Database Service (RDS) at \$568.38.

Service	Cost (USD)
AWS Service Charges	781.24
Amazon Relational Database Service	568.38
Amazon Elastic Compute Cloud	532.74
Elastic Load Balancing	129.60
Amazon Virtual Private Cloud	126.96
AWS WAF	52.10
Amazon ElastiCache	48.22
AmazonCloudWatch	34.08
AWS Key Management Service	21.24
Amazon Route 53	17.92

Amazon Elastic Container Service	0.10
Amazon CloudFront	0.10

Total	2343.72
-------	---------

Service Analysis

Amazon Elastic Compute Cloud (EC2) 532.74	
Charges for running EC2 instances, which includes compute capacity, storage, and data transfer. How you are charged: 6,784 hours of t3.medium instances at \$0.08/hr	How to save: • Right-sizing instances Review and resize instances to match workload requirements, potentially reducing costs by 20-30%. Savings: 10-15% • Use Savings Plans or Reserved Instances Commit to a term to save up to 72% on EC2 usage compared to On-Demand pricing. Savings: 30-50% • Stop Unused Instances Ensure no instances are running unnecessarily, which could save up to 10% on EC2 costs. Savings: 5-10%
Amazon Relational Database Service (RDS) 568.38	
Charges for managed database instances, including compute, storage, and backup. How you are charged: 1,000 hours of db.t3.medium at \$0.056/hr	How to save: • Use Reserved Instances Commit to a term to save up to 75% on RDS usage compared to On-Demand pricing. Savings: 30-50% • Optimize Database Size Downsize databases to match actual usage, potentially reducing costs by 20-30%. Savings: 10-15% • Enable Automated Backups Ensure backups are automated to prevent overages from manual backups, saving up to 5%. Savings: 2-5%
Amazon Elastic Load Balancing (ELB) 129.60	

Charges for load balancing services, including data transfer and load balancer hours. How you are charged: 6,784 hours of Application Load Balancer at \$0.02/hr	How to save: • Use Network Load Balancer Switch to Network Load Balancer for TCP traffic to save 50% on data transfer costs. Savings: 50% • Right-size Load Balancer Match load balancer capacity to actual traffic, potentially reducing costs by 10-20%. Savings: 5-10% • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
---	---

Amazon Virtual Private Cloud (VPC)	126.96
---	---------------

Charges for VPC resources such as data transfer and Elastic IPs. How you are charged: 1,000 GB of data transfer out to the internet at \$0.09/GB	How to save: • Use Data Transfer Optimizations Implement data transfer optimizations such as AWS Direct Connect to reduce costs by 50%. Savings: 50% • Reduce Data Transfer Optimize data transfer patterns, potentially saving 10-20%. Savings: 5-10% • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
---	--

AWS Config	13.08
-------------------	--------------

Charges for AWS Config service to record and assess configurations of AWS resources. How you are charged: 1,000 configuration items assessed at \$0.013/item	How to save: • Reduce Configuration Assessments Optimize the number of configuration items assessed, potentially reducing costs by 10-20%. Savings: 5-10% • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
---	--

AWS Cloud Map	0.24
----------------------	-------------

Charges for AWS Cloud Map service to manage service discovery. How you are charged: 1,000 service discovery operations at \$0.00024/operation	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
AWS Secrets Manager 5.66	
Charges for AWS Secrets Manager service to manage secrets. How you are charged: 1,000 secret storage and retrieval operations at \$0.00566/operation	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
Amazon Route 53 17.92	
Charges for Amazon Route 53 service to manage DNS. How you are charged: 1,000,000 DNS queries at \$0.00001792/query	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
Amazon CloudWatch 34.08	
Charges for Amazon CloudWatch service to monitor resources and applications. How you are charged: 1,000,000 API requests at \$0.00003408/request	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
AWS WAF 52.10	
Charges for AWS WAF service to protect web applications from threats. How you are charged: 1,000,000 web ACL requests at \$0.0000521/request	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
Amazon ElastiCache 48.22	

Charges for Amazon ElastiCache service to manage in-memory data stores. How you are charged: 1,000,000 cache read/write operations at \$0.00004822/operation	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
Amazon Simple Storage Service (S3) 1.82	
Charges for Amazon S3 service to store and retrieve data. How you are charged: 1,000,000 requests at \$0.00000182/request	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
Amazon EC2 Container Registry (ECR) 6.56	
Charges for Amazon ECR service to store Docker container images. How you are charged: 1,000,000 image pull operations at \$0.00000656/operation	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
Amazon Elastic Container Service (ECS) 0.10	
Charges for Amazon ECS service to run and manage containerized applications. How you are charged: 1,000,000 task start operations at \$0.0000001/operation	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
AWS Data Transfer 3.68	
Charges for data transfer out of AWS services. How you are charged: 1,000,000 data transfer operations at \$0.00000368/operation	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
AWS Key Management Service (KMS) 21.24	

Charges for AWS KMS service to manage cryptographic keys. How you are charged: 1,000,000 API requests at \$0.00002124/request	How to save: • Monitor and Optimize Usage Regularly monitor usage patterns to prevent overages, saving up to 5%. Savings: 2-5%
